

NATURALLY LIVED RESPONSIBILITY

As one of the biggest and most modern kitchen manufacturers in Europe, we are aware of the enormous responsibility we have towards the environment, society and our employees. Sustainable and future-oriented thinking and actions are an essential part of our corporate ethics.

The protection of natural resources, a sustainable and high-quality product in addition to the well-being of our employees are prioritized equally to the trustful relationship with our partners and customers along with our social commitment.

ECOLOGICALLY INNOVATIVE

Häcker relies on constant innovation to continuously improve its ecological performance. The principles of a circular economy are key to achieving the goal of ecological sustainability.

PACKAGING

- ✦ Cardboard instead of styrofoam
- ✦ Over 92 % recyclable packaging
- ✦ 100 % recyclable load securing material
- ✦ Use of reusable packaging during delivery
- ✦ Repairing and reusing of damaged pallets
- ✦ Reducing plastic packaging

EMISSION REDUCTION

- ✦ Water-based lacquers with maximally reduced amounts of solvents
- ✦ Optimal formaldehyde reduction according to CARB2 standards

CO₂ FOOTPRINT

- ✦ More than 50 % regional suppliers (within 30 mile radius)
- ✦ Ca. 400 US tons of CO₂ reduction through digitalization
- ✦ Annual savings of 375 US tons of CO₂ through the use of rail transport
- ✦ Electric company cars with charging stations available at headquarters
- ✦ Electric bicycles for employees

PROTECTION OF NATURAL RESOURCES

- ✦ 4,000 planted trees
- ✦ Creation of 430,560 sqft of flowering meadows
- ✦ Creation of a 43,060 sqft wetland habitat
- ✦ Support of insect protection initiatives
- ✦ Support of international reforestation, wind power and hydropower projects

ENERGY

- ✦ Electricity generation through own solar panels
- ✦ Recycling of production waste to generate thermal energy
- ✦ Modernization of our air compressor system
- ✦ Using LED lighting

SUSTAINABLE FRONTS

 Fronts are made from 100 % recyclable materials

 Base is made from at least 89 % renewable sources

 Base is made from at least 70 % recycled wood

AV 1080

AV 1097

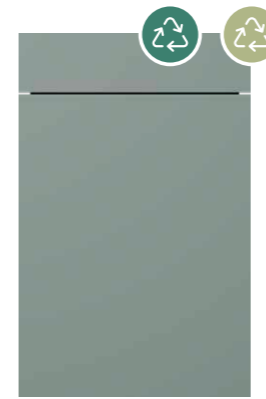

AV 1099

AV 6055

100 % real wood frame made out of solid wood, lacquered

AV 6000

Water-based matt lacquer, formaldehyde free and almost free of solvents

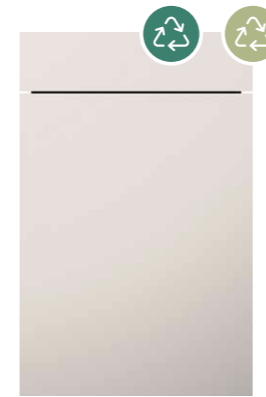

AV 1070

AV 3030

Coating made from more than 50 % recycled PET

AV 2135

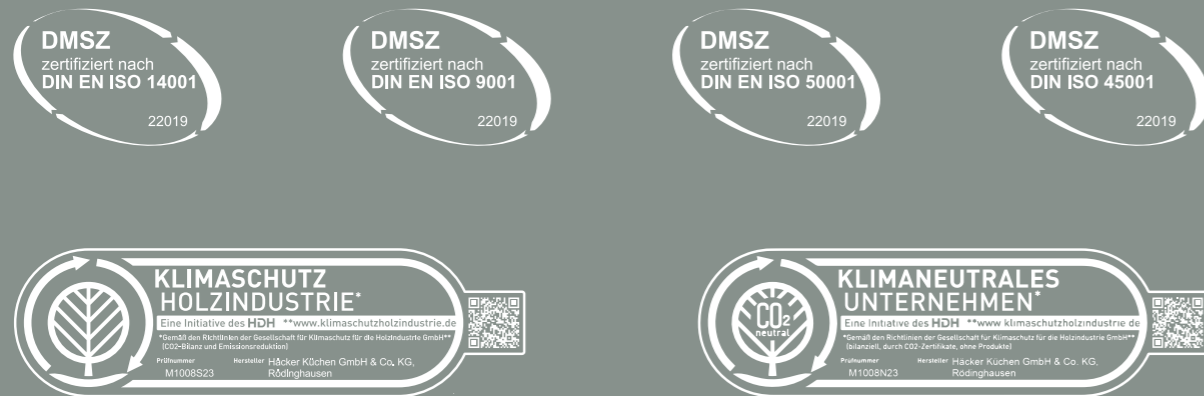

AV 2130

Especially durable through PerfectSense® coating with anti-fingerprint properties

CERTIFICATES AND QUALITY LABELS

Our certificates and quality labels document not just the healthy, safe and sustainable quality of our products, but also detail our commitment to the protection of resources and the preservation of our natural environment. Based on the strict criteria that the independent certification agencies follow, our customers can rest assured that their Häcker kitchens are of highest quality and sustainable.

HEALTHY LIVING

FORMALDEHYDE REDUCED WOOD MATERIALS

Avoiding formaldehyde emissions plays a key role when it comes to healthy furniture. Thanks to optimal formaldehyde reduction our Häcker kitchens have been awarded the best RAL quality label. We provide a healthy living environment - because health is a precious good that needs to be protected.

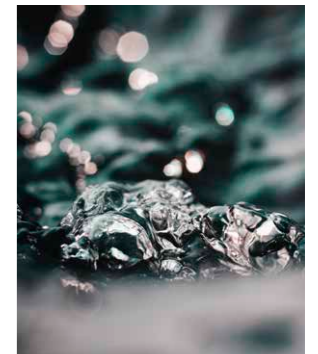

WATER RESISTANCE

PUR GLUED EDGES

We reach the highest quality standards for our edges with the innovative adhesive technology PUResist. They are water repellent and stand out due to their high resistance.

WATER-BASED LACQUERS

In our highly modern lacquering facility we only use water-based lacquers. They are environmentally compatible, containing approximately 90% less solvents. Additionally, they offer many advantages to the end consumer, such as high resistance, pleasant haptics and impressive optics.

QUALITY
SERVICE
SUSTAINABILITY
RELIABILITY
HONESTY

These are the values we stand for.

Häcker - A family-owned company for more than 125 years.
